1. This application contains claims directed to the following patentably distinct species: Claims 1-3 (species I) and claims 4-8 (species II). The species are independent or distinct because the patentability of species I does not require the step of spraying the metallic layer with borax and the patentability of species II does not required the step of spraying the metallic layer with a single layer of silicon powder.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.
